matters

Giving new shape to concierge services

on artificial intelligence have the potential to improve how hotels and other service businesses interact with customers, a new paper suggests.

In the first work to introduce the concept, researchers have outlined the role an AI concierge, a technologically advanced assistant, may play in various areas of the service sector as well as the different forms such a helper might embody.

Their paper envisions a virtual caretaker that, by combining natural language processing, behavioral data and predictive analytics, would anticipate a customer's needs, suggest certain actions, and automate routine tasks without having to be explicitly commanded to do so.

Though such a skilled assistant is still years away, Stephanie Liu, lead author of the paper and an associate benefits of incorporating

professor of hospitality management at The Ohio State University, and her colleagues drew insight from several contemporary fields, including service management, psychology, humancomputer interaction and ethics research, to detail what opportunities and challenges might arise from having an AI concierge manage human encounters.

"The traditional service industry uses concierges for high-end clients, meaning that only a few people have access to them," Liu said.

"Now with assistance of AI technology, everybody can have access to a concierge providing superior experiences."

On that premise, the

into customer service are twofold: It would allow companies to offer around-the-

consistency in their operations as well as improve how individuals engage with professional clock availability and service organizations,

she said. Moreover, as the younger workforce gravitates to more techoriented jobs and global travel becomes more common, generative Al could be an apt solution to deal with the escalating demands of evolving hospitality

trends, said Liu. "The development of AI technology for hotels, restaurants, health care, retail and tourism has a lot of potential," she said.

Despite the social and economic benefits associated with implementing such machines, how effective AI concierges may be at completing a task is dependent on both the specific situation and the type of interface consumers use, said Liu.

Motorola edge 50 Fusion disrupts 25K market

Motorola, India's fastestgrowing Android brand recently launched the motorola edge 50 Fusion, disrupting the sub 25K smartphone segment with its numerous segment best features. The motorola edge 50 Fusion comes with the segments most advanced Sony-LYTIA 700C sensor in its primary camera, the segments only IP68 underwater Water touch technology, and segments brightest 144Hz 10-bit pOLED 3D curved display with Corning Gorilla Glass 5 protection. It goes on sale today at 12 PM onwards on Flipkart, Motorola. in and leading retail stores across India at an incredible limited period offer price starting just at Rs. 20,999 including

The motorola edge 50 Fusion is equipped with a 50MP 2.0m Ultra Pixel Main OIS Camera with segments most advanced Sony LYTIA LYT-700C sensor. Delivering outstanding nighttime photos owing to its 2.0m Ultra Pixel technology which captures more light and gives 4x better light sensitivity owing to its 1.5x large pixels. The secondary camera is a 13MP ultra wide-angle camera that has 120 POV for wider ultrawide shots and fits 4x more of the scene in the frame.

The secondary camera also features Macro Vision which is integrated to bring the user 4X closer to the subject than a standard lens. Both

protection with Smart rear cameras support 4K screen display with video recording as well. Additionally, the motorola edge 50 Fusion features a 32MP selfie camera with Quad Pixel technology which supports 4K video recording, the segments only selfie camera to The motorola edge 50 Fusion flaunts a premium

endless edge design with perfectly integrated camera housing and the segments only IP68 underwater protection with Smart Water Touch technology. Being one of the lightest smartphones in the segment, this ultra-thin motorola edge 50 Fusion weighs a mere 175g and is just 7.9mm thick.

do so.

The device comes in 3 trending Pantone Curated Colours with 3 different finishes, which are as follows: Marshmallow Blue vegan leather finish for a soft and tactile feel. Hot Pink vegan suede finish with an added touch of luxury and Forest Blue color in a sophisticated PMMA (Acrylic Glass) finish.

The edge 50 Fusion boasts the segments brightest 6.67 144Hz 10-bit pOLED curved
